

Enrollment Frequently Asked Questions

1. Can I change my record after I have submitted it?

Yes. Families may enroll and edit their records until December 31. If you add a project after your initial enrollment, be sure to tell your Community Club Leader.

After January 1, contact your Community Club Leader if you need to make a change and ask them to request a change be made at the county office.

2. How does my record become active?

When families enroll for the year, their records are marked as "Pending" until the club leader accepts the enrollment and the county office activates the record. Once the club leader accepts the enrollment, the club is liable for the Program Fees for that person, so most leaders wait until the fees are paid before accepting the enrollment.

If you are a new 4-H volunteer, your record will be activated after you complete the Volunteer Appointment Process, including orientation and fingerprinting.

3. What if my club does not offer a project I want?

Each project must have an adult 4-H volunteer leader. If your club does not have a leader for a project you wish, here are some options:

- * Help recruit an adult to lead the project
- * [Take the project from another club](#)
- * [Join a Countywide Project group](#)
