

Advances in Pistachio Production

University of California research based information on all aspects of pistachio production

November 18th – 20th, 2014

Visalia Convention Center

Advances in Pistachio Production is a comprehensive course taught by University of California Cooperative Extension farm advisors, specialists, and faculty. This course provides an opportunity for growers and orchard managers to learn about the latest research and production recommendations for California pistachio.

For more information and online registration visit our website: fruitsandnuts.ucdavis.edu

Several new additions are available to course participants this year:

New collection of reference materials:

- Pistachio Production Manual (first update in 7 years)
- Bound copy of all presentations
- Nutrient Deficiency in Pistachio booklet
- Electronic resources on physiological, nutritional, and pathological disorders and insect pests

New lectures:

- Step-by-step guide to field diagnostics
- Tree health and irrigation under saline conditions
- Analysis of the global industry: Looking ahead
- Understanding your grade sheet
